Measurement of Earth Resistance as a Precursor of Earthquake

Abstract : Electrical Resistance Method was used to determine the Earth Resistance at Kada in Maharashtra. In this method three electrodes were used called Earth Electrodes and Auxiliary Electrodes made up of Copper and Iron material. By using this method, the voltage generated across two electrodes and therefore resistance can be determined. This may be the precursor or forth casting of the Earthquake.

Keywords Electrical Resistance Method, Voltage Electrodes, Earthquake

Introduction - In this method the three electrodes are used, the circuit for measurement of the earth resistance through earth electrode E to an auxiliary electrode B (which is usually an iron spike) This method can be used to measure the voltage generated between the two electrodes and therefore the resistance. As resistance of earth decreases there is earthquake takes place. Therefore this method is nothing but a precursor of earthquake also.

Experimental Set Up - The set-up consist of electrical resistivity measurements of earth surface by spacing few meters between electrodes. A current is pass through earth electrode E to an auxiliary electrode B inserted in earth at distance away from the electrode A. Second auxiliary electrode A is inserted in earth between E and B. The potential difference V between A and E is measured for a given current I

Applications - Electrical resistance method is very easy and according to get the knowledge of earthquake within a limit of cost also. It is easy to handle. The earth resistance remains constant for the separation between the electrode E and A. This is treated as background resistivity and used an earthquake precursor since it decreases few hours before the earthquake and returns to normal within few hours after the earthquake.

Induction Lecture: By Principal

Student Induction Programme engages with the new students as soon as they come into the institution; before regular classes start. At the start of the induction, the incumbents learn about the institutional policies, processes, practices, culture and values, and their mentor groups are formed.

Q.1 Example of a Formal Email

1. You are looking for an interesting and challenging, summer job. Write an email applying for the post of student Tour Leader. The school's email address is schoolofenglish@info.com.

Dear sir/Madam.

With reference to your advertisement in yesterday's edition of The Times of India.

I am applying for the post of Tour Leader for Indian students learning French as a foreign language at your school of French studies. I am 19

years - old and currently studying for a long diploma in Tourism at MCAST.

4 Worked as a youth leader on various school project. and I enjoyed the work very much because it involved organising various recreational and academic activities for students at school. I have attached

my CV as a word document. You will notice that I have supervised children on a range of sports and cultural activities within the school scout group.

I have also, on several occasions, been responsible for transport arrangements and tickets. On two separate occasions, been also carried out voluntary work at summer camp for school children. I was group leader besides

Computer skills -

- Microsoft Office - Word, Excel, Power Point
- Front Page, Page Maker, CorelDraw

Languages

- Fluent in Hindi, Telgu, English
- Currently learning to speak chines and Esperanto

Interest and Achivements -

- Active member of 'Hyderabad Rocks!' : Helped raise awareness about the need
- Employee of the Year Award (2015, 2016) : For Contribution to Corporate life
- Best student Prize at Osmania University (2012) : For overall acade-
- mic performance and extracurricul
- r activities .

2.1 Types of newspaper reports.

- News articles - These are found on the front page of a newspaper and they inform the reader about things happening internationally, nationally or locally.
- Feature article : These are lengthier writings that cover a story that has been or is in the news. They seek to explore and analyse the reasons and give suggestions at the end.
- Editorials and special column - These are written by the editors and other known & important writers. These columns may provide an expert opinion or a comic or an interesting way of describing a topic.

The seven patterns of S, V, O, C and A elements account for clauses.

1. S + V Josh / yawned .
2. S + V + O He / rubbed / his head
3. S + V + C He / was / hunge over .
4. S + V + A He / stumbled / into the kitchen
5. S + v + O + O His flatmate / gave / him / a
Cup of coffe .
6. S + v + O + C He / called / Josh / a hopeless
fool .
7. S + v + O + A Josh + held / his head / in
his hands .
